Project Title:

I want to make an introduction page about Afrofuturistic and cyberpunk type of architecture in conjunction with my major. Because when I tried to search for this kind of direction, I found no good introductory site about combining architecture with special effects, and I wanted to make this site in a more interactive and engaging way.

- **Home Page/Introduction** –The introduction page I would like to have some fascinating videos, such as clips of Black Panther and Blade Runner, and then dive in.
- About the examples of architectural use in movies
- Presentation of special effects techniques
- Possible patterns in future films
- Gallery Appreciation
- Introductions to famous artists
- Resources Includes Wikipedia profile and definitions
