Project Name: Futuristic Architecture Overview

1. Project overview

Project Overview The goal of my website is to provide an introductory page on the integration of architecture and visual arts, with the hope of attracting more people to this direction based on fascinating research.

2. Resources

<https://www.wallpaper.com/architecture/architecture-in-film-through-the-decades>

3. Audience

The audience can be any visitor who loves science fiction movies, cyberpunk and cosmic exploration, and of course, students of architecture who are interested in this area.

6. The Tone

The tone I think it should be black and blue dominant with a sci-fi touch to maintain a sense of the future.

8. Visual Style

The visual style I wanted to keep the feel of a sci-fi movie, trying to make the page look cooler, not like a simple introduction page, like enjoying a good movie.
